

RISHAV KUMAR

Noida, India | +916398904235 | chrishabh2002@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Engineer with experience building backend platforms, automation tools, and AI systems for real-world operational use. Worked on command-execution agents, production APIs, and security-oriented workflows across fast-moving startup teams. Strong with Python, Linux environments, system debugging, and designing software that balances speed, reliability, and scale.

Experience

Cyberrant Limited (Remote)

Oct 2025 - Present

AI Security Engineer

London, UK

- Worked on AI products built for cybersecurity operations, technical automation, and developer workflows
- Built controlled task-execution systems capable of running terminal operations in Linux environments
- Developed modules for command routing, execution tracking, and result summarization
- Improved workflow reliability through logging, retry handling, and environment diagnostics
- Assisted code inspection and vulnerability-oriented workflows for faster issue discovery

MomntumAI LLC (Remote)

Jan 2025 - Oct 2025

Software Engineer

Nashville, United States

- Built backend services in Python powering live product workflows and user-facing features
- Redesigned API flows and data access patterns, improving response efficiency and retrieval speed
- Worked closely with changing product requirements in a fast-moving startup environment
- Assisted in deploying updates across 10+ production systems using CI/CD workflows, ensuring zero downtime releases.

My Job Grow Private Limited

Jul 2024 - Sep 2024

Machine Learning Intern

Bengaluru, India

- Built end-to-end ML pipelines covering data prep, training, and evaluation.
- Improved model quality through structured experiments and metric-based evaluation.
- Worked with Python, Pandas, Scikit-learn, and TensorFlow for production-style ML workflows.

Projects

Ask Rant AI / Rant AI Agent

Oct 2025 - Present

Commercial Project – Cyberrant Limited

London, UK

- Contributed to commercial AI agents used for cybersecurity guidance and local technical task execution
- Built features for shell command workflows, code checks, and automated diagnostics
- Added structured reporting for outputs, errors, and recommended next actions

EAISeR-AI - AI-powered Defect Detection and Maintenance Automation Platform

Jan 2025 - Oct 2025

Commercial Project – MomntumAI LLC

Nashville, United States

- Worked on civic-tech platform designed to detect public issues and route reports to relevant authorities
- Integrated OpenCV-based vision algorithms for fault detection in images, reducing manual inspection time by 40%
- Supported backend integrations, workflow stability, and feature delivery
- Collaborated in an Agile development team to deliver new features, debug issues, and optimize overall system performance.

AIEvolve AI Agent

Mar 2026 - Present

Personal Project

- Built personal DevOps-focused execution agent for recurring engineering tasks
- Handles command workflows, system checks, deployment assistance, and reporting

Skills

- **Programming Languages:** Java, C, Python, Shell Scripting
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Backend:** FastAPI, Flask, Node.js, REST APIs
- **Frontend:** React.js, HTML, CSS
- **Data & Databases:** MongoDB, Supabase, SQLite, SQL, Schema Design
- **DevOps & Cloud:** Docker, AWS, Render, Linux, Google Cloud Platform (GCP), Git, Github
- **AI & Machine Learning:** Machine learning, Deep learning, Scikit-learn, OpenCV, PyTorch

Education

Galgotias University

Sep 2023 - May 2027

Bachelor of Technology (B.Tech), Computer Science Engineering

Greater Noida, India
